It's good. The hair looks great and real. But when you dye them the hair looks like a paint so it's not really advisable to change the color or else it will look so fake like you painted it. My only suggestion is to make it flexible like a clay you can mold the hair not only mak it big or small or c...

Update since last review - they've added a lot of new hairstyles and the fun just keeps getting better. Layout option is brilliant. This is a great app! I got introduced to k-pop years ago and we all know how big gangnam was. Loved trying some cool hairstyles. It's hilarious if you're a guy and try ...

I really love this app so much cause here you get to style your hair and know which suits you better before making the real one. Such a nice app for hairstyles. I recommend this app to anyone looking out for hairfit styles.. And i'm so happy i didn't encounter any problem while using the app. So gen...

This is an excellent app for trying good hairstyles. The app has many different hairstyles both for men and women. You can try your favourite one. The Hairfit app is simple and cool. I am addicted to this app. Thanks to the team for their effort to make it available for using. Peace.

This is a nice App. Its user interface is quite easy to use and understand. The option to choose between a large variety of hair make it a perfect app where most users will likely find the kind of hair that interest them so much. However, I think it would be a good idea if a chat feature where users...
